Supplemental Nutrition Assistance Program

January 21, 2025

The Supplemental Nutrition Assistance Program (SNAP) is the nation's most important and effective anti-hunger program. It plays a critical role in reducing poverty, improving health and economic outcomes, supporting people who are paid low wages, and serving as the first line of defense against hunger during economic downturns.

Whom Does SNAP Reach?

In federal fiscal year 2024, it helped:

- **847,100** Louisiana residents, or **18%** of the state population (**1 in 5**)
- **41,697,500** participants in the United States, or **12%** of the total population (**1 in 8**)

LOUISIANA	more than 69% of SNAP participants are in families with children	more than 37% are in families with members who are older adults or are disabled	more than 35% are in working families
NATIONALLY	more than 62% of SNAP participants are in families with children	more than 37% are in families with members who are older adults or are disabled	more than 38% are in working families

Many Louisiana households struggle to put food on the table. The most recent data show in 2023:

- **16.2%** of households were “food insecure,” meaning that their access to adequate food is limited by a lack of money and other resources.^b
- **18.9%** of the population lived below the poverty line.
- **25.0%** of children lived in families below the poverty line.
- **14.2%** of older adults lived below the poverty line.

SNAP reaches populations in need: 83% of eligible individuals participated in SNAP in **Louisiana** in pre-pandemic 2020.

SNAP lifted **155,000** people above the poverty line in **Louisiana**, including **71,000** children, per year between 2015 and 2019, on average. (These figures adjust for households' underreporting of benefits.)

What Benefits Do SNAP Participants Receive?

SNAP targets benefits according to need. Households with very low incomes receive more SNAP benefits than households closer to the poverty line because they need more help affording adequate food. SNAP participants in [Louisiana](#) received **\$1.9 billion** in benefits in 2024.

Because of a congressionally mandated re-evaluation of the Thrifty Food Plan — the basis of SNAP benefits — that took effect in 2022, SNAP benefits are higher and better aligned with the cost of a healthy, realistic diet. Nationally, the revision increased SNAP benefits from about \$4.80 to about \$6.20 per person per day in 2024.

	Average SNAP benefit in nominal dollars, fiscal year 2024
For each household member per month:	\$187
For each household member per day:	\$6.16

How Does SNAP Benefit the Economy?

The U.S. Department of Agriculture estimates that in a weak economy, \$1 in SNAP benefits generates \$1.50 in economic activity. Households receive SNAP benefits on electronic benefit transfer cards, which can be used only to purchase food at one of about **261,400** authorized retail locations around the country, including some **4,400** in [Louisiana](#).
